Social Workers • Other Donation and
Transplantation Professionals

Breaking Barriers: Partnerships Redefining Organ Transportation

As the demand for organ transplantation continues to grow, so do the complexities associated with the timely, safe, and secure movement of organs. Join us for an insightful session that addresses some of these pressing challenges through the lens of groundbreaking partnerships established between LifeCenter Northwest and Alaska Airlines, as well as the Mayo Clinic and Southwest Airlines. Representatives from each entity will share their experiences, detailing the intricate processes involved in establishing and implementing these partnerships, offering valuable insights to organizations seeking to forge similar alliances.

At the end of the webinar, participants should be able to:

- Explain the intricacies of successful collaborations between healthcare organizations and commercial airlines.
- Describe the challenges faced when facilitating organ transport in the current environment.
- Apply strategies and best practices shared to garner support from commercial airlines to establish successful, collaborative partnerships.
- Explore effective communication and negotiation techniques that enhance collaboration and buy-in from all stakeholders involved.
