Managers • Quality Improvement •
Social Workers • Other Donation and
Transplantation Professionals

Maximizing Donation Outcomes: Centralized DCD Recovery Strategies

Several OPOs nationwide have adapted the DCD recovery process by transferring patients to a centralized center in an effort to improve the quality of care and maximize donation outcomes. During this session, we will welcome three OPOs, in varying stages of the centralized DCD process, to share their experiences from inception to the current state. They will walk us through the hurdles they have navigated and the strategies that implemented to optimize success.

At the end of the webinar, participants should be able to:

- Explain challenges faced by hospitals in implementing centralized DCD recovery.
- Describe hurdles experienced by families with donor transfers for DCD recovery.
- Identify successful strategies and best practices in centralized DCD recovery.
- Demonstrate an understanding of the ethical and legal frameworks of centralized DCD recovery.
